

ABSTRACTSLIDER ASSEMBLIES

5 A slider assembly 60 for a data storage device, the assembly comprising a  
slider main body 110; a piezoelectric element 130 mounted on the slider  
main body 110; and a head 140 mounted on the piezoelectric element;  
wherein the slider main body can be moved and the piezoelectric element  
10 can be operated to adjust the position of the head with respect to a data  
storage medium.
